

Successful Dress Attire- Men

The primary goal in dressing for an interview is to feel great about ones appearance, while projecting an image that meets the requirements of the position and company. Learn to analyze the public image of the companies one desires to work for. Later, your own plan begins with an analysis of the position, the type of company, and what one personally wants or needs to say through dress.

Some interviewers will decide in the first sixty seconds whether they are interested in you or not (based on personal impressions) and will then spend the remainder of the interview validating their snap judgment.

Your appearance and dress are perceived as a statement of who you are. Professionalism is your goal. The language of dress may speak without words, but it is never silent.
